

Carefree Tire's innovative process of manufacturing is specifically designed to create a tire that has a durable non-porous outer elastomeric skin with a high-density cellular core consisting of trillions of trapped air cells.

The tough-yet-flexible outer skin allows for a firm tread area that provides excellent resistance to abrasion, cutting, punctures, and chemical attack, while the dense micro-cellular core reduces rolling resistance, and allows for greater shock absorption. As a result, not only will a Carefree Tire last four to ten times longer than a similar pneumatic tire, it requires much less effort to roll.

**PUTTING THE WORLD
ON WHEELS!**

FOR OVER 40 YEARS,
Accella Tire Fill Systems has been
recognized as the leader in tire
flatproofing systems.

Since 1971, the scientists at Accella Tire Fill Systems have been developing a line of technologically advanced polyurethane products and in 1977 developed a high performance flexible polyurethane formulation. By combining this proprietary blend of micro-cellular polyurethane with a novel manufacturing method of centrifugal casting, the light-weight, durable Carefree Tire provides an “air cushioned” ride without adding any significant weight, delivering the assurance and durability of a solid tire with the performance of a pneumatic tire.

KEEP YOUR LANDSCAPING BUSINESS ON A ROLL WITH OUR FLAT FREE GUARANTEE!

Professionals and DIYers know the name Carefree Tire. We have been around for decades and have replaced thousands of small tube tires with Carefree flat free tires! Constructed of a durable non-porous outer elastomeric tread with a high-density cellular core consisting of trillions of trapped air cells, Carefree tires have the feel of a conventional air-filled tire with the added benefits of being resistant to punctures and abrasion. Plus, you will never waste time fixing flat tires. Carefree keeps your landscaping and lawn service business on the roll. With application coverage for virtually every piece of equipment in service today, we can outfit your needs with just a phone call or click on our website.

DIYers also know the frustration of a flat tire on their lawn equipment. Wasting time fixing a flat (or just adding air) is cutting into your time to relax or enjoy something other than yard work. Carefree offers many alternatives to tube tires and we offer the **FLAT FREE FOREVER GUARANTEE!** You won't get this with any tube tire.
