

National Certified Dealer Network

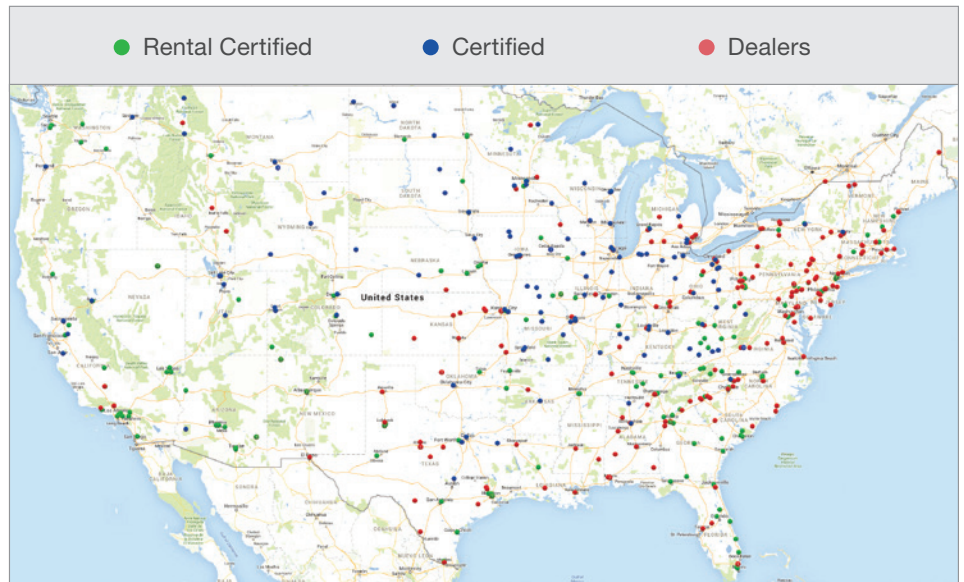

When you purchase TyrFil from one of our certified dealers, you can be confident you are getting the flatproofing solution that will perform in your application. Carlisle TyrFil has partnered with our dealer network to ensure approved tire fill processing methods are performed and dealer sales personnel are trained to offer the right product per application. With over 500-plus years combined tire fill experience, our sales and technical support teams work closely with our dealers to solve your flat tire problems. We are committed to eliminating flat tires, reducing downtime, and promoting safety.

A dealer must meet the following criteria to receive certification:

- Adhere to approved tire fill processing guidelines
- Offer approved flatproofing products for the application
- Employ a certified tire fill processor
- Provide a heated fill and cure area
- Keep accurate records
- Submit quality control samples
- Follow safety procedures
- Maintain adequate liability coverage
- Offer a Wheel Exchange Program

** In addition to the above criteria, our Rental Certified Dealer Network guarantees to not chunk.*

We keep the world rolling.
No flats, smoother ride, more protection.
