

BioSolv Gold

100% Bio-Based Solvent Made
with Renewable Resources

BioSolv Gold is a powerful parts cleaner that can be used as a direct replacement for Isopropyl Alcohol (IPA). BioSolv Gold is cost-effective, offers longer performance life and has low vapor pressure and high loading capacity compared to IPA options. It is for use with all flushless pumping systems.

BioSolv Gold is a patented blend of vegetable esters formulated for use as a parts and degreaser solvent. It is a 100% biodegradable product made with soybean and corn derived ingredients. The BioSolv Gold formula has a flash point over 140° F (60° C). This formula has been approved for use at military bases and has proven successful in industrial parts cleaning applications.

Benefits:

- Longer performance life – cost effective
- Low vapor pressure and high loading capacity
- No petroleum or environmentally hazardous ingredients
- No ozone depleting chemicals (ODC)
- No hazardous air pollutants (HAP)
- No global warming compounds
- Non-flammable by OSHA, DOT and IATA regulations
- EPA approved SNAP solvent
- Non SARA 313 reportable
- Non-toxic and non-carcinogenic
- Ideal for cup lubricant

BioSolv Citrus is also available. This formula is primarily used to deep clean the mixing well and progressive cavity pump on the Green Machine.

For additional information, please contact your Technical Support Representative or consult the Safety Datasheet.

We keep the world rolling.
No flats, smoother ride, more protection.
