

AutoFil Recycler System

The Carlisle TyrFil AutoFil Recycler System is a tire fill system that can recycle and reuse post-consumer oil-based tire fill. Since 2002, this machine has made it possible to keep more than 150 million pounds of tire fill out of landfills each year. Its convenient one-step process increases efficiencies and requires very little labor. It's easy to operate by a single person and clean-up only takes five minutes.

Features and Benefits:

- Pumping speed up to 26 Lbs./Min.
- Crumb/liquid ratio up to 65/35
- HMI touch screen
- Monitor grinder motor amperage to reverse motor in case of grinder jams
- Uniform recycled products provide high consistency
- Consistent high-quality product and performance
- Eliminates the need to scrap old tire fill

Electrical requirements: 208-240 Volt, 100 Amp, three phase, 60 Hertz
380-480 Volt, 60 Amp, three phase, 50 Hertz

Machine weight: 3,800 pounds
