

TyrFil Electric Pump

The Carlisle TyrFil Electric Pump is a virgin tire fill pumping system. It delivers faster speeds than pneumatic pumping systems. Its computer-controlled process features allow for faster and safer pumping while incorporating safety features such as a non-fused disconnect, High-Pressure Alarm, Cavitation Alarm, and Low-Pressure Alarm. It's easy to maintain and with minimal wear parts.

Features and Benefits:

- 10.4" touch screen
- Pumping Rate: Up to 60 pounds per minute
- Operator-controlled jog footswitch
- Pressure display
- Pounds pumped display
- Pump speed control
- Password protected setup screens
- Pump fault screen
- Training to certify TyrFil Flatproofing Technicians
- Startup and cleanup with less effort
- Delivers quality product every time
- Can troubleshoot most problems over the phone

Electrical Requirements: 208-240 Volt, 30 amp, single phase, 60 Hertz

We keep the world rolling.

No flats, smoother ride, more protection.
